Milestones

Our Strengths

Financial Resources

KGS's strong equity structure, high liquidity, robust balance sheet structure, long-term borrowing capacity, ability to use a variety of market tools, and access to local financial resources differentiate KGS from other companies operating in the same fields of business.

Technical Competence

Machinery and equipment capacity, strong organizational capabilities, vast in-house know-how based on experience, references from completed works, local and international certifications demonstrating unlimited business competence, engineering background, energetic and dynamic grassroots staff led by an experienced team of executives create a synergy that is indicative of KGS's technical competence in completing projects on time, within budget, and of the specified quality.

Leadership

KGS's leadership position in the fields it operates is further strengthened by the many pioneering and innovative projects it carries out, and the strong and steady increase in its performance.

Employment Strength

KGS consistently growing and providing great contributions to the country's economy since the day it was established, has an employment strength of 2.000+ with a qualified workforce.

Key Technical Staff

KGS has established specialized divisions with defined functions and authorities to ensure the efficient execution of production tasks. A structured system of interaction among these divisions has been implemented. Each division is led by experienced professionals with relevant education and is staffed with qualified personnel who have substantial field experience.

When required for large-scale projects, we have the capability to rapidly scale our workforce to up to 1,000 personnel.

This flexibility enables us to operate effectively as both a subcontractor and a general contractor, delivering projects of any scale or complexity.

We are committed to continuous development. Every day, our employees gain valuable experience and strive to enhance the quality of our services and deliverables.

Certifications & Achievements

KGS Management Systems were developed in accordance with existing standards, normative and technical documentation. It covers all activities of the Company in the sphere of construction works and Services, associated with these kinds of works.

Licenses with Category

Construction and installation works	Category 1
Project Activity	Category 1

Licenses

- Operation of main pipelines
- Installation, repair of oil and gas equipment
- Transportation of dangerous goods
- Design, manufacture, installation, repair of power, explosion-proof electrical equipment
- Certificate for the right to work in the field of industrial safety «Maintenance of gas-consuming systems»
- Production, processing, acquisition, storage, sale, use, destruction of poisons
- Design, installation, repair of boilers, vessels and pipelines operating under pressure above 0.7 kg / cm²
- Certificate for the right to work in the field of industrial safety «Maintenance of gas-consuming systems»
